SOVIET PHYSICS–Doklady is a bi-monthly journal published by the American Institute of Physics for the purpose of making available in English reports of current Soviet research in physics as contained in the "Physics Sections" of the Proceedings of the Academy of Sciences of the USSR. The Proceedings appears thirty-six times per year and the "Physics Sections" are accumulated and English translations of them are published in six issues per year.

Transliteration of the names of Russian authors follows the system employed by the Library of Congress.

This translating and publishing project was undertaken by the Institute in the conviction that dissemination of the results of research everywhere in the world is invaluable to the advancement of science. The National Science Foundation of the United States encouraged the project initially and is supporting it in large part by a grant. Translation and printing are being handled by Consultants Bureau, Inc.

The American Institute of Physics and its translators propose to translate faithfully all of the scientific material in the "Physics Sections" of the Proceedings of the Academy of Sciences of the USSR appearing after January 1, 1956. The views expressed in the translated material, therefore, are intended to be those expressed by the original authors, and not those of the translators nor of the American Institute of Physics.

One volume is published annually. Volume 3 will consist of six issues and will contain all of the scientific material published in the "Physics Sections" of the original Russian journal during the 1958 calendar year.

Subscription Prices:

Per year (6 issues), starting with Vol. 3, No. 1

General: United States and Canada	$35.00
Elsewhere	38.00
Libraries of non-profit academic institutions:	
United States and Canada	15.00
Elsewhere	18.00

Back numbers for Vols. 1 and 2, $5.00 per issue; Vol. 3 and subsequent, $7.00 per issue.

Subscriptions should be addressed to the American Institute of Physics, 335 East 45th Street, New York 17, New York.
